# 1. Starter

## 1.1. Login

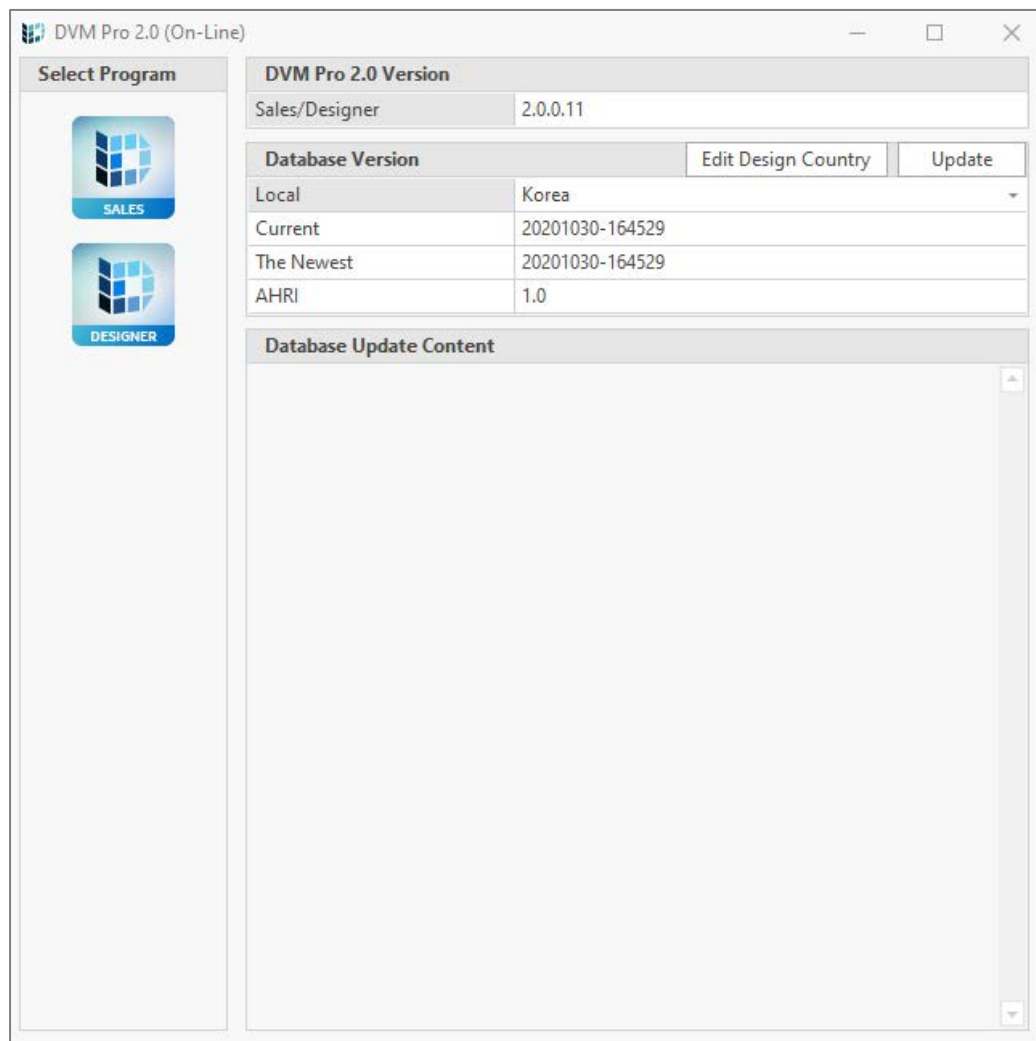

The screenshot shows the DVM Pro 2.0 login interface. The window title is 'DVM Pro 2.0'. The login form is titled 'Log-in' and 'DVM Pro 2.0'. It contains two input fields: 'ID' and 'Password'. Below these is a checkbox labeled 'Remember ID'. At the bottom of the form is a blue button labeled 'Log-in'.

- ① ID : Enter the registered e-mail when registering as a member.
- ② Password : Enter the password set by the individual.
- ③ Remember ID : If checked, the entered e-mail is saved and displayed at the next login.
- ④ Log-in : After entering your email and password, press the Enter key or click the log-in button to start the Starter screen (when login is successful).

If there is no internet connection, the login window is not activated and the Starter screen is launched immediately. However, you must log in normally at the beginning after installing the program.

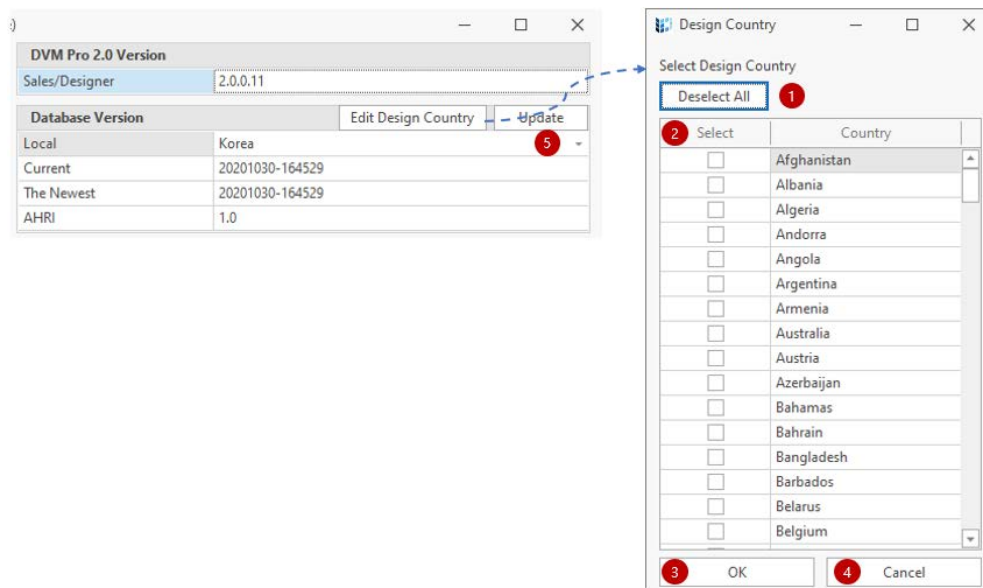

## 1.2. Window Composition

- ① Select Program : When the icon is clicked, Sales and Designer programs are run.
- ② DVM Pro 2.0 version : Check the current program version.
- ③ Database Version : You can check the current database version and the latest database version for each selected region. If the latest version is higher than the current version, a database to be updated exists.
- ④ Database Update Content : If there is a database to be updated, the content to be updated is displayed.
- ⑤ Edit Design Country : You can add or delete the country to be designed.
- ⑥ Update : Update the database if there is a database to be updated.

If you do not have an Internet connection, you cannot check the latest database version and updates, and database updates cannot be performed.

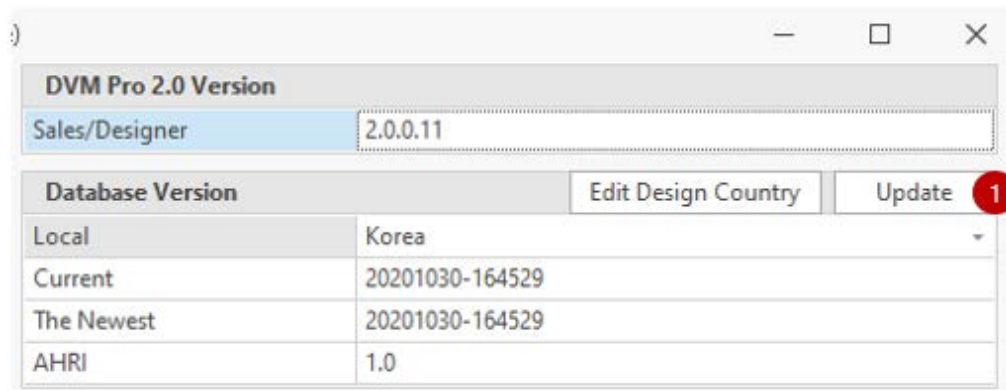

### 1.3. Edit Design Country

- ① Deselect All : Deselect all selected countries.
- ② Country List : You can check the list of countries and whether design is possible (selected), and you can add (select) or delete (deselect) countries that can be designed.
- ③ OK : When the button is clicked, the current setting is saved and the database for the added (selected) country is downloaded. When the download is complete, the Design Country window closes.
- ④ Cancel : When the button is clicked, the current setting is canceled without saving.
- ⑤ Designable Countries : You can check the list of countries that can be currently designed, and when selecting a country, you can check the current database version and the latest database version of the country.

If you do not have an internet connection, you cannot add a design country.

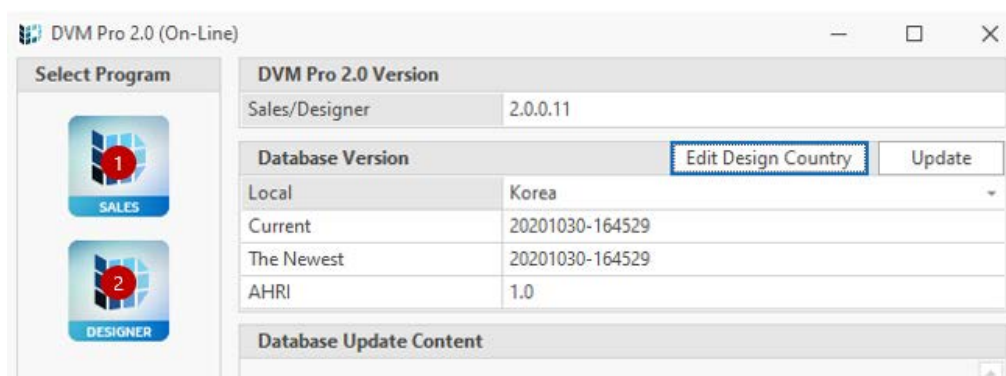

## 1.4. Database Update

- ① Update : If there is a database to be updated, click the button to update the database.

If there is no internet connection, the database cannot be updated.

## 1.5. Run Sales and Designer

- ① Sales : When the button is clicked, the Sales program is started.
- ② Designer : Clicking the button runs the Designer program.
